

Ahmed Abdullellah Mohammed Dahmash

Architectural Engineer

Sana'a, Yemen | +967 777 879 088 | ahmeddhmsh@gmail.com

Summary

Architectural engineer with more than four years of combined training and professional experience, working both sides of the project: producing drawings and 3D visualizations in Revit, AutoCAD, Lumion, and 3ds Max, and supervising construction on site from excavation to final finishing. Experienced in quantity surveying, QA/QC, technical reporting, contract preparation, and coordination with clients, contractors, and government bodies. Have worked on government-approved projects featured on national television, and currently completing the CAPM certification.

Career Highlights

- Designed government-approved projects that were featured in two national television appearances.
- Supervised full-cycle construction across 15+ residential, commercial, and structural projects, from excavation to finishing.
- Raised sales by about 10% at Al-Watania through technical client outreach and proposals.
- Graduated with distinction from Sana'a University; graduation project recognized as a flagship project.

Core Skills

Design and drafting: Autodesk Revit (BIM), AutoCAD (2D/3D)

3D visualization and graphics: 3ds Max, Lumion, SketchUp, Adobe Photoshop

Site and construction management: Site supervision, QA/QC, construction lifecycle management, slab and foundation inspection, concrete slump testing

Quantity surveying: Material take-offs, structural and finishing estimation

Documentation and coordination: Specification writing, contract preparation, technical reporting, stakeholder coordination with government entities, clients, and contractors

Other tools: Google Earth Pro, Microsoft Office (Excel, Word, PowerPoint)

Selected Projects

- **Hadda Complex** — four adjacent residential buildings. Led site supervision from excavation through basement slab casting (Al-Sarh Golden Tower).
- **Twin Villas** — full-cycle site supervision of two villas built simultaneously, from excavation to interior finishing (Al-Sarh Golden Tower).
- **Residential and commercial buildings** — four projects (two- to four-apartment layouts). Architectural and working drawings, facade design, and site supervision (freelance).
- **Facade and window systems** — designed 5+ facade and window systems and surveyed openings for 10 residential buildings and 3 towers (Al-Watania).
- **Epoxy flooring** — three hospitals (Al-Thawra, Elite International, Modern German Hospital) and a food manufacturing facility. Project supervision (freelance).
- **Structural strengthening and construction** — rebar doweling, column and footing jacketing, and floor columns and slab casting. Site supervision, surveying, and layout (freelance).
- **Waterproofing systems** — roof, foundation, wet-area, and underground-tank waterproofing using membrane, acrylic-fiberglass, and blinding-concrete methods. Site supervision (freelance).

Professional Experience

Site Supervisor — Al-Sarh Golden Tower, Sana'a

Dec 2025 – Present

- Ran full-cycle site supervision across multiple residential and commercial projects at the same time, including the Hadda Complex and twin villas.

- Managed concrete QA/QC end to end: delivery-receipt checks, slump testing, pour logistics, and on-site labor teams, keeping to safety standards and schedule.

Freelance Architectural Consultant — KSA, Sana'a, and Ibb

Jan 2025 – Dec 2025

- Delivered drawings, facade design, and site supervision for residential and commercial projects, plus specialist epoxy-flooring, structural-strengthening, and waterproofing works across multiple sites (see Selected Projects).

Architect and Site Supervisor — Al-Watania for Glass and Aluminum, Sana'a

Apr 2024 – Dec 2024

- Surveyed openings and designed 5+ facade and window systems for 10 residential buildings and 3 towers.
- Prepared technical specifications and contracts for 15+ projects, handled official transactions with government bodies, and reported to the executive director.
- Supported client outreach that raised sales by about 10%.

Architect and Site Supervisor — Al-Asala for Engineering Design and Construction, Sana'a

Oct 2023 – Mar 2024 (concurrent role)

- Carried out quantity take-offs for 4 skeletal construction projects in concrete and steel, and estimated quantities for a major interior finishing phase.
- Supervised 3 projects through the full construction cycle and reported to the consulting engineer against specifications, building codes, and safety requirements.

Architect and Site Supervisor — TESIS ARC Office for Engineering Consulting and Design, Sana'a

Nov 2023 – Mar 2024 (concurrent role)

- Prepared architectural and construction drawings for 5+ projects, including residential buildings and villas, and interior design concepts for 2 projects.
- Supervised 3 projects from excavation through slab casting and reported on compliance with project specifications.

Architectural Trainee — Al-Asala for Engineering Design and Construction, Sana'a

2020 – 2022 (during studies)

- Produced architectural and construction drawings in AutoCAD and Revit, and built 3D models and renders in 3ds Max, Lumion, and SketchUp.
- Attended sites and supported supervision and surveying tasks under senior engineers.
- Assisted with quantity take-offs, estimations, and technical reports.

Education

Bachelor of Architectural Engineering — Sana'a University, Sana'a

Jan 2019 – Jun 2023

- Graduated with distinction; graduation project recognized as a flagship project and designed for government entities.

Certifications and Courses

- Certified Associate in Project Management (CAPM), Civil Academy — 2026
- Professional Site Supervision and Construction Management, Line of Design Institute — Nov 2023 – Feb 2024
- AutoCAD, Revit, 3ds Max, Photoshop, and Microsoft Office, Sana'a University — 2019 – 2020
- AI in Architecture and Heritage Preservation Workshop, GOPHCY and CATS — Feb 2024
